

Fakhirazzahrah Ramadhani

+62 821 1492 2953 | fzzahrah@gmail.com | <https://www.linkedin.com/in/fakhirazzahrahramadhani> | Makassar, Indonesia

Informatics Engineering graduate from Hasanuddin University and Bangkit Academy alumna with hands-on experience in Data Engineering and data-driven technologies. Skilled in developing ETL pipelines using Python, Pandas, SQL, and PostgreSQL, as well as integrating APIs and automating data processing workflows. Experienced in machine learning-based forecasting and backend development, with a strong foundation in Cloud Computing. Passionate about building reliable data systems and transforming data into meaningful insights.

WORK EXPERIENCE

PT Telkom Akses Area Sulbagsel

Indonesia

Software Engineer Intern

Sept 2024 – Dec 2024

- Developed ARINA, a web-based platform using Laravel to digitalize real-time customer complaint ticketing and technician inventory
- Built Data Visualization Dashboards to streamline monitoring of ticket statuses and material usage, effectively reducing field stock discrepancies.
- Conducted Full-Cycle System Development, from analyzing workflows (UML/ Flowcharts) to executing Alpha Testing to ensure operational stability.

EDUCATION

Hasanuddin University

Indonesia

Informatics Engineering

Aug 2021 – Feb 2026

- Final Project (Thesis): Implementation of FastGAN Model for Image Synthesis in the Ornithology Domain. Developed a generative model to synthesize high-resolution bird images, focusing on training efficiency and high-fidelity output using small datasets.
- Coder Institute: Learned foundational Mobile Development using Dart (Flutter) to build basic logic and responsive interfaces, ensuring functional layouts and user-centric designs.
- GDSC Universitas Hasanuddin: Participated in various technical workshops and community events, focusing on collaborative problem solving and strengthening communication skills within the developer ecosystem.

Bangkit Academy by Google, GoTo, and Traveloka

Indonesia

Cloud Computing Learning Path

Feb 2024 – Jul 2024

- Completed 900+ hours of a rigorous curriculum covering Cloud Computing, Backend Development, and Professional Skills, consistently achieving top-tier performance standards throughout the program
- Completed 11+ technical courses in Google Cloud and backend development (Cloud Engineer path, Cloud Foundations, Cloud Run, Associate Cloud Engineer prep).
- Capstone / Final Project (200 hours): Cloud & Backend Developer – Supported a 2-person cloud team in managing backend services and database connectivity on Google App Engine to ensure data availability.

PROJECTS

ARINA

Telkom Akses Internship System

- Developed an automated ticketing and real-time monitoring system using the Laravel framework, designed to replace manual data entry and streamline the tracking of customer complaint statuses (Open, In Progress, Closed).
- Built an Integrated Material Tracking feature to monitor technician inventory usage in the field, implementing database synchronization to minimize stock discrepancies and improve reporting accuracy for the operational team.

Generative AI for Ornithology: FastGAN-Based Image Synthesis

Thesis

- Developed a high-efficiency generative model using the FastGAN architecture to synthesize high-resolution bird images, specifically optimized for training with limited datasets.
- Implemented hinge-loss and skip-connection techniques to ensure high-fidelity image output and stable model convergence, reducing computational resource requirements while maintaining image quality.

SkinScan: AI-Powered Skin Cancer Detection

Mobile Application Project

- Worked in a team as a Backend and Cloud Developer to deploy services on Google App Engine, ensuring the application's backend architecture was stable and accessible for mobile users.
- Collaborated within a 2-person cloud team to handle database integration and authentication, focusing on data synchronization to maintain consistent user diagnostic history.

CERTIFICATE

Build Infrastructure with Terraform on Google Cloud

- Coursera by Google | 2024

Google Cloud Computing Foundations: Data, ML, and AI in Google Cloud

- Coursera by Google | 2024

Develop Your Google Cloud Network

- Coursera by Google | 2024

[Belajar Penerapan Machine Learning dengan Google Cloud](#)

- Dicoding | 2024 – 2027

[Menjadi Google Cloud Engineer](#)

- Dicoding | 2024 – 2027

[Belajar Dasar AI](#)

- Dicoding | 2024 – 2027

OTHER

Technical Skills

- **Backend:** Python, REST API, PHP
- **Frontend:** HTML, CSS, JavaScript, TypeScript, React, Next.js
- **Database:** MySQL, PostgreSQL, Firestore
- **Cloud/Tools:** Google Cloud Platform, Git, GitHub, Postman, Apache JMeter, psutil, Figma

Soft Skills

Analytical thinking, problem-solving, collaboration & teamwork, communication, adaptability, attention to detail.

Languages

Indonesian (Native), English (Professional)
